The Estuario, Calacatta, Calacatta Gold, Onyx and the new Blanco Carrara and Nero Marquina models have the possibility of being presented with a Bookmatched effect (mirror effect) the same way the natural marble can be directly extracted from the quarries. For each model there exists a Reverse option (referred to with an "R") which enables to create boockmatched options.

The Endmatch is a very special feature that the design of the Calacatta and Calacatta Gold own. Using the same slab just turning it 180°, it's possible to obtain continuing vein with endless pattern.

Los modelos Estuario, Calacatta, Calacatta Gold, Onyx y los nuevos Blanco Carrara y Nero Marquina permiten la posibilidad de presentarse con efecto Bookmatch (efecto espejo) de la misma forma que el mármol natural es directamente extraído de una cantera. Para cada modelo se ha creado una versión reversa (marcada con "R") para presentar efectos Bookmatched.

El Endmatch es una característica muy especial que tienen los diseños de los modelos Calacatta y Calacatta Gold. Usando la misma tabla, sólo girándola 180°, puede obtenerse un patrón de vena continua sin fin.
